INFRARED CAMERA AUDITS & SCANS

Our Infrared Camera Offers Detection and Visualization of Infiltration and Exfiltration & Guarantees our Customers a Flawless Job.

With our Infrared Camera you can actually see your energy heat loss

Before

After

BLOWER DOORS & ENERGY AUDITS

Professional energy auditors use blower door tests to help determine a home's airtightness. Testing the Airtightness of a home using a special fan called a Blower Door can help to ensure that air sealing work is effective. A blower door is a powerful fan that mounts into the frame of an exterior door. The fan pulls air out of the house, lowering the air pressure inside. The higher outside air pressure then flows in through all unsealed cracks and openings. Our Blower Door Technology helps us locate the exact location of air infiltration.

STOP Thermal Bi-Passes!

Is your home Weatherized properly? The maintenance steps you take now can eliminate expensive repairs, and make your home safer and more energy efficient. Take action now to protect your home from leaks, heat loss and drafts. There are many ways you can reduce the amount of energy loss.
